

Horse Powered Reading®

Improving Reading Skills with the help of horses!

What it is

Horse Powered Reading® is a research based curriculum that integrates social-emotional learning with academics, allowing students to see & experience reading with their entire mind, body & emotions.

Why Horses

Interacting with horses fosters the development of self-motivation, confidence & independent problem solving. Including horses in a learning setting transforms the lesson into a whole body experience, a powerful way to achieve educational goals.

Learning a few key reading skills combined with motivation, self-efficacy/confidence, and persistence helps **create exponential growth in reading skills.**

How It Works

Students interact with the horses from the ground while using toys & props to learn the five critical reading skills: Phonemic awareness, decoding, fluency, vocabulary and comprehension.

Instructors

All activities are uniquely designed & facilitated by:
Shelly Adkins, certified Horse Powered Reading Instructor & Educator.
Circle "C" Horses Cindy Nimtzt the owner of Circle "C" Stables, Educator and Eagala Certified Instructor.
